

GLL Plug-In API

SDK and Support Extension

Price list – December 2021

The AFMG SDK (Software Development Kit) for the GLL Plug-In API enables loudspeaker manufacturers to independently develop plug-in extensions for their GLLs.

At present the GLL Plug-In API is available for EASE Focus (version 3.1 and higher), and will be supported by other AFMG simulation products in the future. For detailed information about its features and implementation, please refer to the [GLL Plug-In API website](#).

The **AFMG SDK for GLL Plug-In API** is obtained by a subscription (period 1 year), which includes:

- Plug-In Module Interfaces + Documentation
- 12 hours of development support via phone and email
- Quality Check by AFMG (verification against misuse before signing the GLL Plug-In)
- Signing of the GLL Plug-Ins by AFMG (unlimited number)

Signed GLL Plug-Ins can be used in GLL files without restriction. Their use does not require a valid subscription.

If more than 12 hours of support are needed during a subscription period, a **Support Extension for GLL Plug-In Development** can be obtained from AFMG. This includes additional 12 hours of support.

Prices:

AFMG SDK for GLL Plug-In API 1 year subscription, incl. 12 hours development support	2,500.00 EUR
Support Extension for GLL Plug-In Development Additional 12 hours support	1,200.00 EUR

These products are governed by AFMG Terms and Conditions for the GLL Plug-In API.
